

ADVISORY: 4016	SYSTEMS AND PROGRAMMING	DATE: 11/26/80
----------------	-------------------------	----------------

TITLE: PRINTFD Source Code

Purpose

To announce the availability of 'COPY' COBOL source code (PRINTFD) and to describe how it is used.

Definitions

PRINTFD - COBOL source code to be copied via the 'COPY' statement in the Data Division.

General Description

PRINTFD is a file description of a shop standard print file with records of 134 characters in length.

Within this code are the basic file description and a description of the print record containing 134 bytes defined as filler.

Usage of PRINTFD will enhance standardization by providing consistent structure and names for printed report files (e.g., print tapes).

Procedure to Follow

PRINTFD may be accessed with the COPY statement of COBOL (i.e., COPY PRINTFD) in the source program Data Division.

A SYSLIB DD JCL statement must be included in the COB (COBOL compile) step or yor job, i.e., //COB.SYSLIB DD DSN=SYS1.COBSRCE,DISP=SHR.

Copy of Source Code

Below is a copy of the source code for PRINTFD.

```
FD PRINT-FILE
  LABEL RECORDS ARE STANDARD,
  BLOCK CONTAINS 0 RECORDS,
  RECORD CONTAINS 134 CHARACTERS,
```

RECORDING MODE IS F,
DATA RECORD IS PRINT-RECORD.

01 PRINT-RECORD.
02 FILLER PIC X(134).
